

Part 2: Build Experience

Goal: build the LUX page by refactoring the starter home page, and understand how a page file is put together.

Where this sits: Part 1 Setup → **Part 2 Build Experience** → Part 3 Learn Lit.js → Part 4 Connect to Server

Steps

1. **Recap from Part 1**
   - Starter app deployed, home page working
2. **Big picture: Experience → Pages → Widgets**
   - Service Portal: portal → pages → widgets
   - AIUX: experience → pages → widgets
3. **Open the starter home page file**
4. **Create the LUX page from it**
   - Copy the home page, rename to the LUX page
   - Route: `./lux-lab`
5. **Imports, top of the file**
   - `html`, `css` from `lit`
   - `customElement` from `lit/decorators.js`
   - `AIUXElement` from `aiux-components-core`
   - `i18n` from `aiux-services`
   - Side-effect imports: feature card component, LUX Lab widget
6. **Decorators**
   - What a decorator is

- `@customElement('x-1433234-sn-aiux-lux-lab-page')`: registers the page as an HTML tag
- Why the scope prefix in the tag name

7. **The class**
   - `extends AIUXElement`: a page, no server data
   - Preview: widgets use `AIUXWidgetElement` (Part 3)
8. **`static styles`, high level**
   - Only `:host { display: block; }`
   - Layout comes from classes, not CSS
9. **`render()` and the `html` template**
   - Hero card: label, heading, description
   - Side card: sample widget info
   - Bottom card: slot for our widget
10. **Styling with Tailwind + DaisyUI**
    - DaisyUI: `aiux-card`, `aiux-card-body`, `aiux-btn`, `aiux-badge`
    - Tailwind: `grid`, `gap-4`, `mb-8`, `lg:grid-cols-3`
    - Theme tokens: `text-text-primary`, `bg-surface-primary`
11. **Translations with `i18n.getMessage()`**
12. **Navigation buttons**
    - `./incidents`, `./home`, `./lux-lab`
13. **Drop the widget on the page**
    - `<aiux-lux-lab></aiux-lux-lab>`
14. **Build, deploy, open `/lux-lab`**
15. **Checkpoint**
    - LUX page loads, layout responsive, widget area in place

Next: Part 3, Learn Lit.js. We open the LUX Lab widget and go through it line by line.
